

September 26, 2018

To Cathy Stepp, James Payne, Linda Holst, Thomas Poy, and All Others This May Concern:

Thank you for the EPA study of our area showing the contamination levels in groundwater. The recent offer of a reverse osmosis system on one faucet or the refrigerator of a residence from the Armenia Growers Coalition is neither a short nor long term solution to contamination levels. As the highest-level federal oversight agency, it is within your power to help the people of the Towns of Armenia and Port Edwards. We request the EPA use its authority under the Safe Drinking Water Act, Emergency Section 1430.1, to address the contamination.

Sincerely,

Concerned Residents of Juneau County Town of Armenia and Wood County Town of Port Edwards
